

Motivate students to be more invested in their learning and each other

Classcraft combines the time-tested principles of great teaching with a modern approach to student engagement, social emotional learning, and soft skill development.

Designed to create a game-like experience in the classroom, students unlock real-life privileges and recognition to help themselves and their team by exhibiting positive behaviors

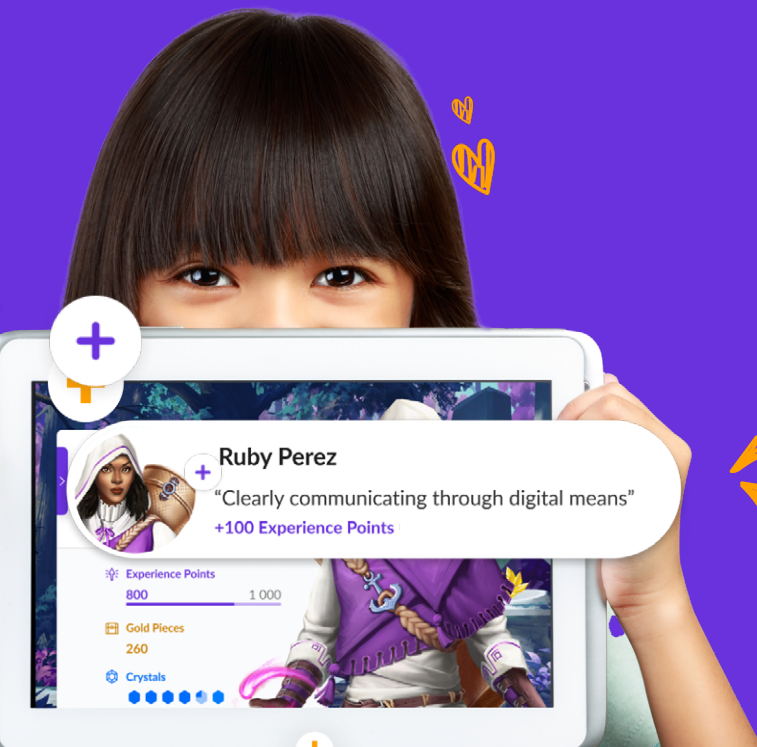

and completing assignments. Learning becomes a way to encourage students to advocate for one another and feel empowered in the classroom and in life.

This guide will help you better understand the platform and how to get started with your parent account.

How Classcraft works at school

By promoting positive behaviors and emphasizing collaboration above competition, Classcraft encourages students to work together to achieve their goals. This builds stronger relationships between peers and their teacher, and creates an environment where students are ready to learn. Here are the basics of how it works:

- Each student has an avatar that serves as a digital representation of their progress.
- Teachers give students points for meeting behavior expectations like handing in assignments or being helpful to one another.
- These points allow students to “level up” and experience new things within Classcraft — earning rewards and special real life privileges.

How parents can participate from home

Learning is better when it's an experience that parents, students, and teachers all share. By participating in Classcraft at home, parents reinforce expectations set by teachers in the classroom, increasing student buy-in and engagement.

Give your child points at home for exhibiting positive behaviors like completing homework or being helpful.

Follow your child's progress in their classes via the app or website.

Communicate directly with your child teacher whenever you need to.

How parents can participate from home

1

Cassidy has invited you to join Classcraft!

By joining Classcraft, you'll be able to see what Rose is up to and get important updates from the teacher.
Your parent code is: [hnb4orih](#)

JOIN CLASSCRAFT

Get your parent code from your child's teacher.

It should come in an email or a handout and should look something like this: "o5cfdbm5"

2

Enter your parent code

Parent code [What's this?](#)

NEXT

Create your parent account.

In your web browser, go to app.classcraft.com/parent and enter your parent code.

3

✓ You are signing up as Rose McMahon's parent.
